It is time for my annual report on insect new issues. Again in 2003 we had a drop in the number of new insect issues with a 25% drop following a 38% drop last year. I measure the number of new issues by the height of the stack of 3x5 index cards, one per stamp, that I accumulate each year. (20mm = about 100 cards). Local and known illegal issues are not included. Does anyone else have comparable data for other biological subjects? Is this a general trend or is it just true for insect new issues?

1996	80mm = ~400 stamps	2000	165mm = ~825 stamps
1997	119mm = ~595 stamps	2001	191mm = ~955 stamps
1998	125mm = ~625 stamps	2002	122mm = ~610 stamps
1999	133mm = ~665 stamps	2003	91mm = ~455 stamps

Thailand's 2004 TB Labels - by Fran Hammond

The Anti-Tuberculosis Association of Thailand has issued a set of ten labels showing butterflies of Southeast Asia. The labels are valued at 5 baht each and are identified as follows:

<i>Bhutanitis lidderdalei</i> Atkinson, BHUTAN GLORY	PAP	Parnassiinae
<i>Graphium agamemnon agamemnon</i> L., TAILED JAY	PAP	Papilioninae
<i>Cethosia biblis perakana</i> Fruhstorfer, PERAKAN RED LACEWING	NYM	Nymphalinae
<i>Polyura delphis delphis</i> Doubleday, JEWELLED NAWAB	APA	Charaxinae
<i>Stichophthalma louisa siamensis</i> Rothschild		Amathusiidae
<i>Papilio memnon agenor</i> L., GREAT MORMON	PAP	Papilioninae
<i>Papilio demoleus malayanus</i> Wallace, MALAYAN LIME BUTTERFLY	PAP	Papilioninae
<i>Troides aeacus thomsonii</i> Bates, THOMSON'S GOLDEN BIRDFLY	PAP	Papilioninae
<i>Junonia almana almana</i> L., PEACOCK PANSY	NYM	Nymphalinae
<i>Danaus melanippus hegesippus</i> Cramer, BLACK-VEINED TIGER	DAN	Danainae
